

Cloud Computing Association in Taiwan co-organized the “2016 IoT Patent Trend Seminar” with the Taiwan Electrical and Electronic Manufacturers’ Association (TEEMA)

The IoT (Internet of Things) is one of the most popular and innovative technologies, IoT-related startups continue to appear one after another, striving for media exposure focus for their technology and products or for corporate mergers, acquisitions and fund-raising opportunities. Not just high-tech startups companies have a soft spot for IoT technology, manufacturing-based Taiwan traditional industries are also trying to catch this wave of IoT boom, looking forward to introducing IoT applications to create a new generation of automated development. However, under the boom of this IoT wave, many IoT technology derived problems are also emerging one by one. These problems, are not only testing IoT technology and innovation, but are also becoming a considerable challenge for the development of IoT. Therefore, this seminar will invite experts to perform in-depth analysis of IoT patent trends, and will also invited Chungwa Telecom operators to discuss the future facets of the development of IoT from the point of view of telecom operators looking at the innovations IoT.

Date: Sep. 23rd, 2016 (Fri)

Time: Registration starts at 1:00 PM

Location: Meeting Room no.2, 7th Floor, TEEMA

Fee: free of charge (limited availability)

Agenda :

Time	Title	Speaker
13 : 00~13 : 30	Registration	
13 : 30~13 : 35	Greeting	
13 : 35~14 : 00	Industrial upgrading and transformation action plan and services group Introduction	Industrial Development Bureau, Ministry of Economic Affairs
14 : 00~14 : 40	From the Looking at the innovative development of IoT	Chungwa Telecom Enterprise new application

	from the telecommunications industry	office Dr. Wang, Ching-Hung
14 : 40~15 : 00	Tea Break & Exchange	
15 : 00~15 : 40	R & D and Intellectual Property Cooperation Mechanism	Wispro Group Jackson Lin, Vice President
15 : 40~16 : 20	Reflecting again on the implications of the Internet of Things for industry competition	IEK, ITRI Chao, Tus-Yu, Deputy General Director
16 : 20~	雙向交流 Bilateral exchange	

Organizer: Taiwan Electrical and Electronic Manufacturers' Association

Co-organizer: Cloud Computing Association in Taiwan
